

GT3000 AIR PURIFIER

Porters EcoCare offers you and your family The GT3000, which is one of the most advanced whole-house air purification systems on the market. Incorporating photo catalytic oxidation technology, high level negative ionization, safe levels of ozone, and electrostatic filtration, the GT3000 reduces particles and inactivates microbes thus providing a cleaner, healthier environment for you and your family.

Using four advanced technologies, the GT3000 helps to eliminate odors, smoke, pollen, dust, bacteria, mold, pet dander, viruses, and much more. Noticeable pollution is eliminated in as little as 15 minutes, and the most difficult pollution in as few as 24 hours.

Unlike other air purifiers that have only one or two ways of eliminating pollution, the GT3000 has four advanced technologies to destroy pollution from the air, embedded in walls, ceilings, floors, carpets, furniture, clothing, on counter tops and other surfaces. These technologies help to sanitize everything in the house and reduces or eliminates all odors, including cigarette smoke, mildew, cooking odors, and more.

Be sure to contact Porters EcoCare for pricing and questions about the GT3000

GT50 AIR PURIFIER

GreenTech Environmental is proud to introduce the most innovative small-area (up to 50 SF area coverage) air purifier ever, the GT50. The GT50 is the only plug-in air purifier that puts you in control of the output so you can adjust it according to your needs as often as they change. The GT50 uses the scientifically-acclaimed power of activated oxygen (ozone), in conjunction with negative ionization, to destroy E-coli, MRSA, Legionella, Candida, Staph, Salmonella and Giardia more effectively than chemical disinfectants. In fact, it kills E-coli more than 3,000 times faster than chlorine. Ideal for bathrooms, laundry rooms, work stations, janitorial closets or kitchens, the GT50 has a modern design that complements any decor. So lightweight and compact that it fits easily into the palm of your hand, the GT50 is usually at the top of every seasoned traveler's "Must Pack" list because you never know what the last guest may have left behind.

Experience the renewed energy and life-enhancing effects of breathing pure, clean air, and stop the proliferation of toxic bacteria that are polluting your indoor environment and compromising your health without you even realizing it.

YOUR FAMILY AND NEIGHBORS HAVE BEEN TURNING TO PORTERS FOR 60 YEARS

The Porters name has been providing dry cleaning and commercial laundry services in Northwest Indiana since 1951. In the late 1970s Porters Restoration began performing fire restoration services, including walls, ceilings, carpeting and duct work. Porters Restoration grew as water damage mitigation and complete disaster reconstruction services were added.

Porters EcoCare was formalized in 2010 out of a growing need for mold testing and remediation.

Porters Restoration, Porters EcoCare and Porters Remodeling brands represent a wide range of expertise and quality services.

OUR CORE VALUES HAVE REMAINED CONSTANT:

- Outperform our competitors
- Exceed our customer's expectations
- Do all things with integrity

DUCT CLEANING | MOLD REMEDIATION | AIR PURIFYING SOLUTIONS
ECO-FRIENDLY CARPET & UPHOLSTERY CLEANING

DUCT CLEANING

According to the National Air Duct Cleaner's Association (NADCA), a typical six-room home creates over 40 pounds of dust annually through everyday living. In addition, the typical family generates a great deal of contaminants and air pollutants such as dander, dirt and chemicals. Most people do not realize that there is also bacteria mold lurking in the air ducts and vents in their homes.

Vent duct cleaning is important, as the dirt residing there is not only a nuisance, but can also be hazardous for one's health. It can cause problems such as asthma and respiratory allergies. To save yourself from such problems, you should clean your air ducts at least once a year, if not once in the spring and again in the fall.

Here are 5 reasons why you should contact Porters EcoCare today:

1. Savings – As estimated by the US Environmental Protection Agency, removing just four-tenths of an inch of dirt, dust and debris from your HVAC coils will slash energy consumption up to 21%. And 21% less of what you otherwise use is a big deal as it translates into significant savings on your monthly utility bill.

2. System efficiency and maintenance – Without the proper maintenance routine for your HVAC systems and air ducts, breakdowns are most likely to happen. The problem with these breakdowns is that they will compromise the efficiency of your system, resulting in additional expenses. HVAC repairs or parts replacement can cost a few hundred dollars, and of course, replacing the entire unit will cost a whole lot more.

3. Quality of indoor air – Duct cleaning in your home or office is vital in keeping indoor air breathable and free of invisible health hazards. Only regular air duct cleaning can get rid of the dust, allergens and toxins found in our duct systems.

4. Allergies and other chronic illness – Hiring Porters EcoCare becomes a real necessity if family members suffer from allergies or chronic respiratory illnesses. Cleaning the duct systems is a proven effective method of reducing the amount of allergens found in a home.

5. Eliminate odors – Musty odors or any funny smell has no place in the home. So when you've lighted enough scented candles and hung so many air fresheners and still the air smells musty, it's time to have your ducts cleaned of the mold or mildew growing within.

We use Abatement Technologies high-performance air duct cleaning equipment and specialty tools, which physically removes dirt, debris and other contaminants from commercial and residential duct work systems.

MOLD REMEDIATION | REMOVAL

Mold is a serious issue for homeowners across the country. No home is immune, even if you have never had a mold problem in the past. One mold occurrence can eventually destroy your home and cause significant health problems for your family. A large number of homeowners don't even know they have a mold concern until an inspector detects it. DON'T let mold go unnoticed in your home!

Discovering a mold situation in your home might seem like one of your worst nightmares, but it does not have to be. We are dedicated to returning your home to normal. Our superior solutions are based on years of experience, restoring peace of mind to families like yours. We kill the mold and eliminate the stains it leaves behind.

Porters EcoCare offers mold solutions throughout the Midwest. Take a proactive approach and call us today. We will be happy to schedule a mold inspection for your home or business.

Air and surface testing has become more important in recent years as the awareness of toxic compounds has grown. Many species of mold can produce highly toxic compounds. Even if you haven't been through a flood, there still be mold growing in your home. This is because there are other sources of water damage. For example, a leak in the roof can cause water in ceilings and walls. A leaking pipe can cause moist conditions that encourage mold growth. Your HVAC system is another potential cause of mold problems in your home. The problem could appear near the intake of the system, be hidden in your air ducts or be right in your air conditioner itself.

BEFORE TREATMENT

AFTER TREATMENT

We eradicate mold and eliminate mold stains with an advanced modern treatment process. Unlike some other remediators, you won't find us sandblasting or grinding stains, thus, aerating mold and other potentially harmful debris. Our stain remover completely removes the stain and it does so with less disruption at a lower cost.

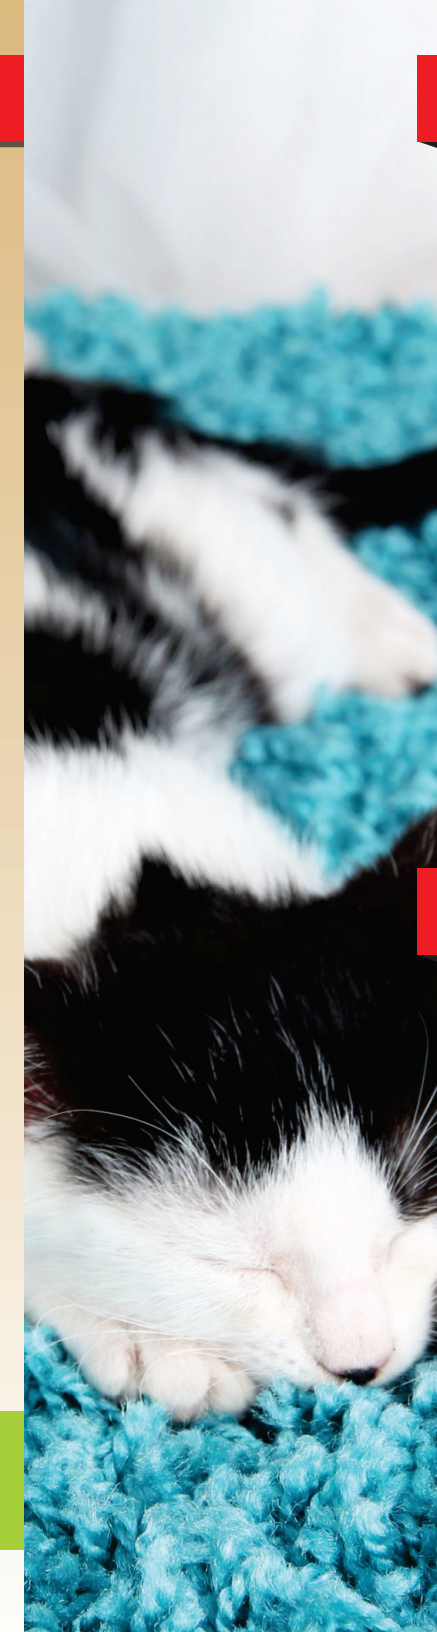

"They were wonderful!"
Barbara R., Crown Point, IN

CARPET CLEANING

The basis of every building is the flooring. When carpets are not cleaned properly it reflects on the homeowner or business. Regular vacuuming and dusting will help to prolong the clean appearance of carpets, but are they really clean?

Periodic professional cleaning will remove these pollutants and allow the business or homeowner to maintain the area for a longer period of time. Porters EcoCare technicians provide a complete carpet cleaning service that eliminates dirt, grit, dust mites, allergens and stains from carpeting. We incorporate the latest commercial cleaning equipment specifically designed to get into those hiding places normal cleaning misses. Our knowledgeable professionals carefully examine the carpeting for wear and condition to provide the proper cleaning procedures that will best eliminate the problems safely.

Porters EcoCare will bring back the fresh new look of carpeting while providing the security in knowing the carpets are completely clean and healthy for family and business.

UPHOLSTERY CLEANING

Those hard to remove stains and dirt are unattractive and can shorten the life of your furniture. There are certain products that will remove specific stains, but some are not suggested for use on the different kinds of upholstery. Using the wrong product could be an expensive error if irreversible harm is done to upholstery. A professional cleaner can identify the spot and apply the correct cleaning solution that will safely remove the stain and not damage the furniture.

Porters EcoCare has a team of professionals who use only the latest in cleaning product technology along with commercial grade equipment to remove dust, dirt, and those tough stains. Our technicians are trained in the wide variety of fabric characteristics to ensure the proper solutions are used to prevent discoloration and damage to the upholstery.

Periodic professional cleaning of all upholstery by Porters EcoCare will increase the like-new appearance of your furniture and help to create a safe, welcoming atmosphere.
