

# A Partnership for Success

## We are a Nationwide Virtual Clinic

4D Healthware Virtual Specialty Care PC is a primary care clinic specializing in general practice. It provides comprehensive healthcare services mainly through general practitioners and family medicine doctors. The clinic's focus aligns with 4D Healthware's mission of enhancing patient care through technology, particularly in underserved areas.

- Smartphones and Tablets
- Mobile apps
- Video
- E-mail
- Educational Games

- Health Education
- Monitoring of Vitals
- Diet and Nutrition Support
- Medication Adherence and Management
- Cognitive Fitness

## FQHCs' are important to us

FQHCs play an important role in supporting their community. Providing care services to the underserved. In these uncertain times, financial and operational challenges can be overwhelming. When budgetary resources are strained, it is critical for an FQHC to:

- operate with maximum operational efficiency
- preserve financial security
- maintain staffing levels to continue operations
- maintain qualifications and achieve goals for grant funds; Money inflow is very important for medical practices. Without a constant source of revenue, medical practices cannot pay bills, pay employees or take care of patients.

Inefficient and improper business processes will lead to patient dissatisfaction which will result in patients leaving the practice. FQHCs must concentrate on:

- maximizing their business and staff efficiency
- minimizing financial risks
- prioritized on site patient visits
- improving patient's overall health
- growing their patient geographic base
- minimum risk of covid exposure

## FQHCs' of the future

The Technology Enabled FQHC of the Future will:

- Compliment telemedicine with RPM for its potential to lower health care costs, improve chronic disease management, and reduce preventable repeat trips to the emergency room.
- Successfully implement a hybrid of brick and mortar in person visits with ongoing 24/7 patient monitoring and support in between visits.
- All of the proper support has to be in place in order to keep patient satisfaction high.
- FQHCs can reduce patient-no show rates, decrease referral leakage.

Using technology:

FQHCs have to move beyond all traditional ways of managing patients and move to a system that supports their operation and their patients in mutually beneficial ways. RPM continues to grow and evolve as consumers demand the option to receive care at home. The consumerization of healthcare is here and happening at a pace that traditional healthcare finds daunting without the right technology partner.

## We Are Different

Cultural Competency

Patient Engagement

Health Disparities

Cognitive Fitness

## Can't you go it alone?

Yes, you certainly could create, modify or wait to launch your own RPM program. However, we encourage you to consider the following factors:

### BENEFITS OF PARTNERING WITH 4D HEALTHWARE

#### Getting Started With 4D Healthware:

From new patient enrollment to remote monitoring, our platform is easy to use. We integrate with your electronic health record (EHR).

#### Get Access to Our Virtual Healthcare Staffing All Stars:

With nearly a decade of experience our staff are adept in using quickly advancing technology solutions as well as possess the warm personal skills needed to make patients feel at ease during their virtual experiences.

#### We provide the Remote Patient Monitoring Devices:

We take care of storing, shipping, and repairs for RPM equipment with no cost to patients for devices.

### GOING IT ALONE WITHOUT 4D HEALTHWARE

#### Getting Started on Your Own:

How will you build your remote patient monitoring healthcare system? Priorities to consider are a user-friendly, culturally responsive experience with encrypted information.

#### Finding and Training Staff on Your Own:

Hiring qualified staff is vital to the success of any healthcare provider. However, great consideration must be given to vetting, training and monitoring staff.

#### Sourcing and Providing Your Own Remote Patient Monitoring Devices:

When getting started, give great consideration to your process in shipping, storing, and repairing each device.

4D ensures that you can provide scalable, effective, and culturally responsive care.
