

## WHO WE ARE

Clinify Health supports provider financial stability, improves health outcomes for vulnerable populations, and facilitates the transition to value-based care through technology solutions for managed care plans and healthcare organizations.

## WHO WE HELP

### MANAGED CARE ORGANIZATIONS

Create risk-based partnership models, enhance relationships with FQHC providers, receive real-time quality measure data, analyze SDoH factors, and track provider performance metrics.

### FEDERALLY QUALIFIED HEALTH CENTERS

Improve quality measures, monitor KPIs with customizable dashboards, manage patient populations with care tools, increase transparency into payer obligations, enhance patient engagement with electronic assessments, and engage specialty care providers for efficient referral workflows.

### HEALTHCARE COLLABORATIVES

Create a framework for coordinated care involving clinical and social health partners, combine patient data for shared access, manage patient care across partner organizations, and monitor collaborative outcomes and patient engagement for reporting.

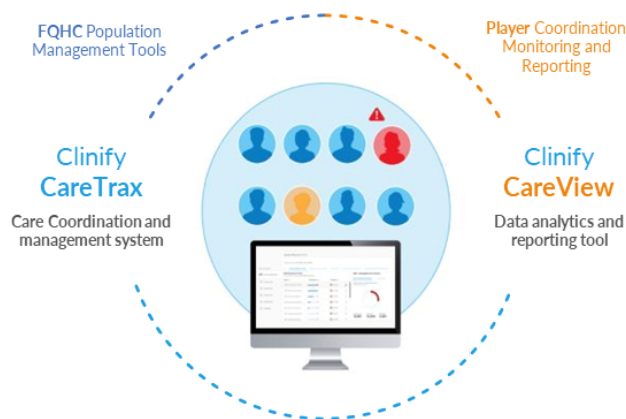

### SAFETY NET HOSPITALS

Standardize clinical data across EHR platforms, improve transparency in quality measure performance, streamline clinical workflows with a unified platform, and enhance specialty referral processes.

## HOW WE HELP

Our platform empowers Medicaid Care Managers with the tools to deliver efficient, personalized care, backed by data-driven insights for continuous improvement in patient outcomes and care team performance.

**Care Management Suite:** Comprehensive Care Plan creation, outreach documentation, direct communication via SMS and email, access to patient profiles, medical history, and SDoH data.

**Benefits:** Streamlines care coordination, enhances patient engagement, facilitates personalized care delivery.

**Intelligent Recommendation Engine:** Automated suggestions for Care Managers on effective Patient communication and action steps based on SDoH, Quality and Risk.

**Benefits:** Improves Patient education, ensures timely care delivery, and increases appointment adherence.

**Advanced Analytics & Reporting Performance:** tracking for care management teams, linkage of care activities to patient outcomes, patient care plan enrollment visibility, and risk stratification analysis.

**Benefits:** Enables data-driven decision-making, identifies impactful care management strategies, and optimizes resource allocation for high-risk patient groups.
