

THE NEW WAY TO 340B

# The only vendor-agnostic solution continuously monitoring your 340B program to ensure savings and compliance.

Developed by and for Federally Qualified Health Centers (FQHCs), Ryan White Clinics and STI Grantees

## The Challenge

The 340B Program is unnecessarily complex, fragmented, and opaque. The average FQHC works with numerous vendors and partners across millions of disparate data points – resulting in limited program visibility, compliance risks, and millions of dollars in lost 340B savings annually.

If an entity is solely reliant on monthly or quarterly analyses and annual external audits, they are almost certainly taking undue risks while missing savings opportunities.

## The Solution

Louvir solves for the complex and dynamic nature of the 340B program by continuously analyzing the state of your 340B Program across all vendors while leveraging industry Intelligence derived from leading KPIs, best practices, and benchmarked data sets,

### HOW ARE FQHCs USING LOUVIR

#### MANUFACTURER ANALYSIS

Comprehensive NDC level impact analysis of manufacturer restrictions. Review the impact historically as well as forecast future impact.

#### PHARMACY AND TPA NETWORK ANALYSIS

Aggregated EHR, TPA and pharmacy data in one place identifies out of network and contracting opportunities.

#### INVENTORY ANALYSIS

Historic and trending prescribing and purchase data insights driven by pricing, rebates, reimbursements, and vendor fees to ensure you are not being overcharged for 340B purchases

#### FINANCIAL REPORTING

Generate automated financial statements in the format and frequency needed by your financial departments. Script count, P&L, balance sheet, income statement, cash flow and more...

#### COMPLIANCE

Customize your own audit plan & continuously audit 100% of claims with the click of a button.
