

Connecticut is Burning 40 Million Gallons of Gasoline Just on Lawncare Each Year

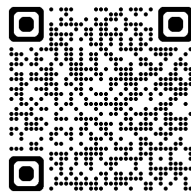

The result?

- Enormous Amounts of Global Warming Gases
- Dangerous Chemicals Breathed in by Workers
- Loud Noise Harming Hearing of Workers
- Disturbing the peace of everyone especially sleeping babies and those who work from home

HB #6263 is a Small Step Forward

- It requires state agencies to start replacing gas-powered leaf blowers, lawnmowers and trimmers with electrical-powered versions in late 2027.
- It includes all kinds of exceptions to use gas-powered equipment for emergencies and special situations.

Scan this QR Code to see a short 2023 video about a CT landscaper who uses only electrical equipment.
