

Setup Guide for Alexa

1. Plug in the Alexa Device

Connect the Alexa device to a power outlet using the included power adapter.

Is the device powered on?

2. Download the Alexa App

Install the Alexa app on your smartphone or tablet from App Store (iOS) or Google Play (Android).

Is the Alexa app installed?

3. Open the Alexa App

Launch the Alexa app and sign in with your Amazon account.

Are you signed in to the Alexa app?

4. Talk to Alexa

When the setup is complete, the device is ready to use. Try speaking a command like "Alexa, what's the weather?"

If yes, your Alexa device is successfully set up.

Troubleshooting

Issue	Resolution
Device not connecting to Wi-Fi	Restart your router and try connecting again.
Alexa not responding to commands	Check that the microphone is not muted, restart the device.
Alexa app won't install or open	Ensure your device has the latest OS updates.
