COMPANY PROFILE

OUR VISION

To be a globally trusted and innovative partner in delivering high-quality industrial minerals and raw materials, empowering industries through reliability, integrity, and sustainable supply chain solutions.

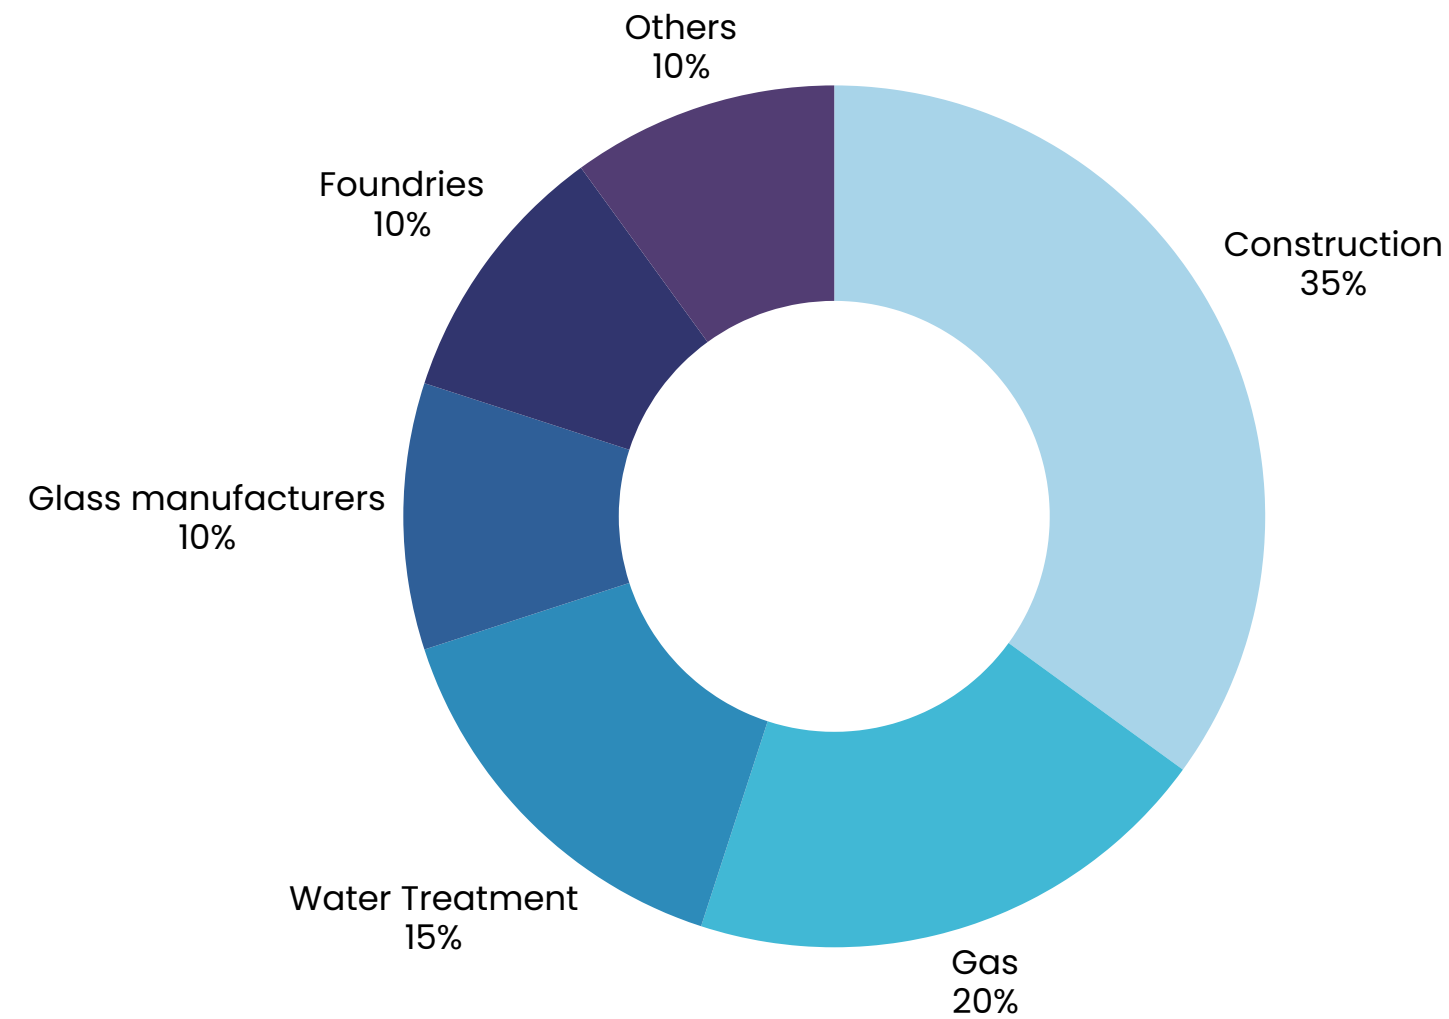

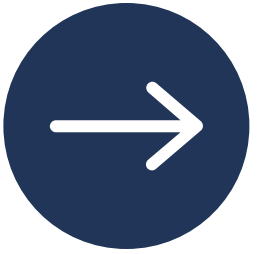

OUR MISSION

Our mission is to support global industries by delivering high-quality raw materials with consistency, reliability, and integrity. We are committed to building lasting partnerships through efficient logistics, personalized service, and a strong focus on transparency, sustainability, and customer satisfaction.

KEY ACTIVITIES

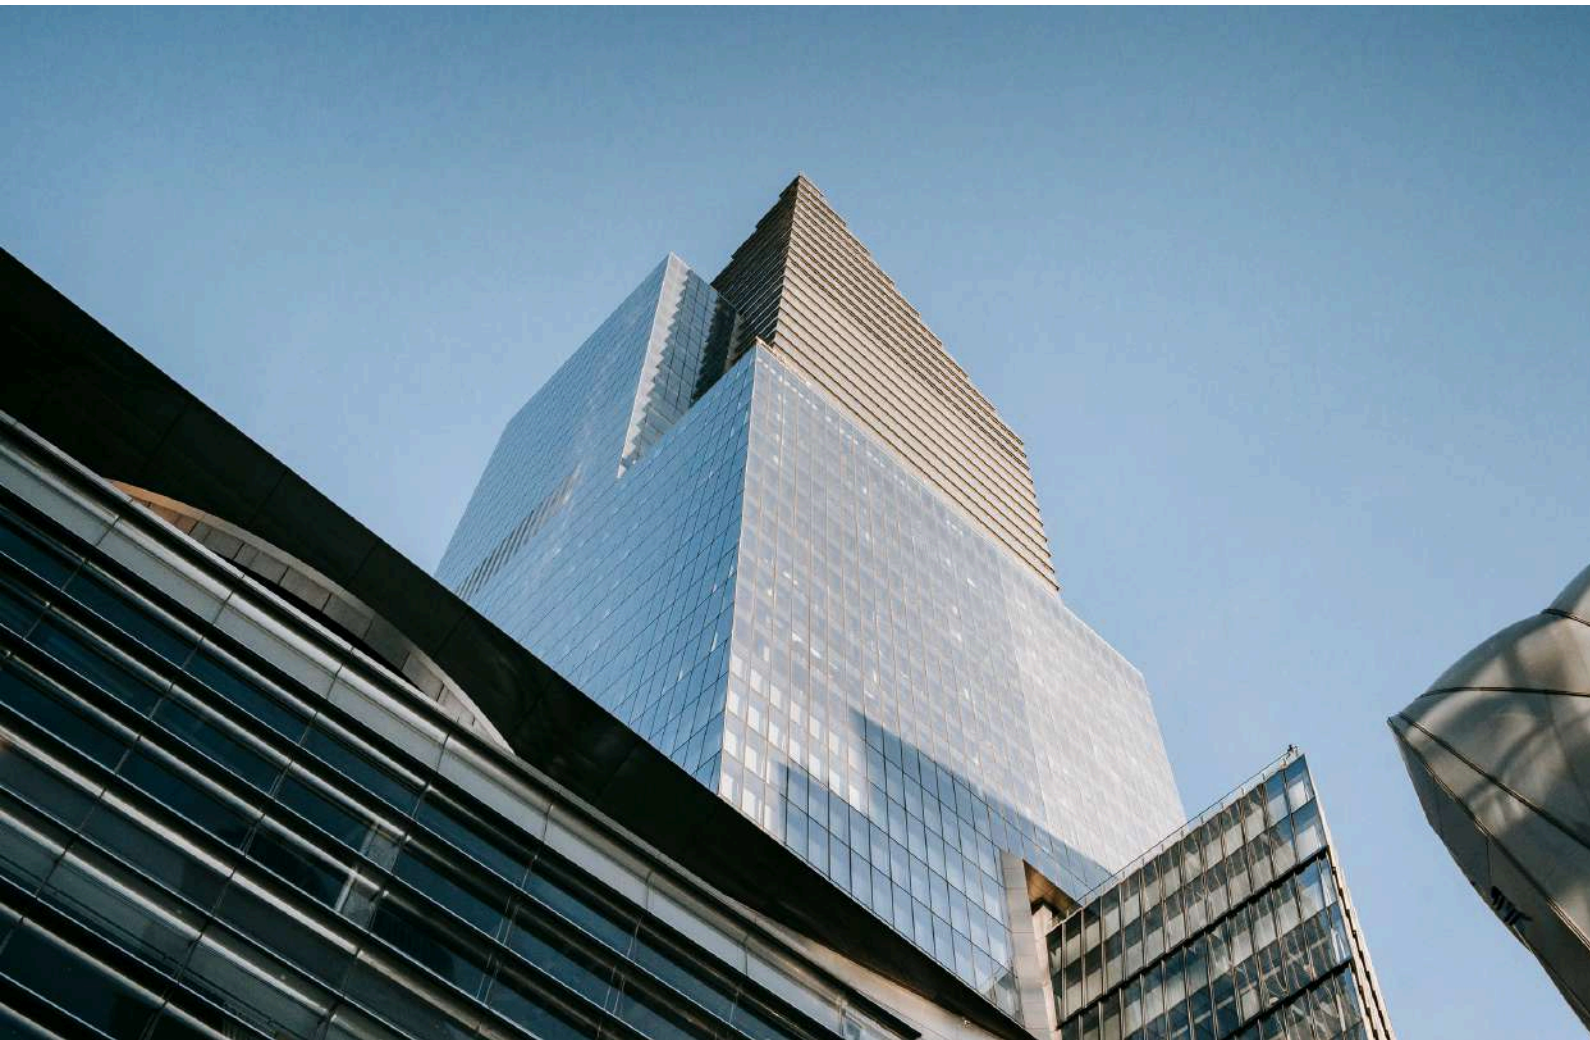

At Jade Waves Enterprise, our key activities include sourcing high-quality raw materials from trusted partners, overseeing processing and packaging near strategic ports, and managing seamless export logistics to global markets. We focus on building long-term client relationships through personalized service, ensuring compliance with international trade standards, and continually exploring new market opportunities. Through strong digital outreach and consistent quality assurance, we aim to be a dependable link in the global industrial supply chain.

CLIENTS WE SERVE

At Jade Waves Enterprise, we proudly serve a diverse client base across multiple industries. A major portion of our business—around 35%—comes from the construction sector, followed by 20% from oil & gas companies utilizing our materials for drilling and sealing applications. Water treatment plants account for 15% of our clientele, while 10% each comes from glass manufacturers and foundries. The remaining 10% includes clients in industries such as paint, rubber, ceramics, and chemicals, all relying on our consistent quality and dependable supply chain solutions.

PRODUCT HISTORY

We began our journey with a focus on supplying core materials like Silica Sand and Bentonite, serving key industries such as construction and water treatment.

As client needs evolved, we expanded our product range to include Fly Ash, Quartz, Salt, and Activated Bleaching Earth—broadening our reach across multiple sectors.

Today, we continue to grow by adding new, in-demand raw materials while staying committed to quality, reliability, and customer satisfaction.

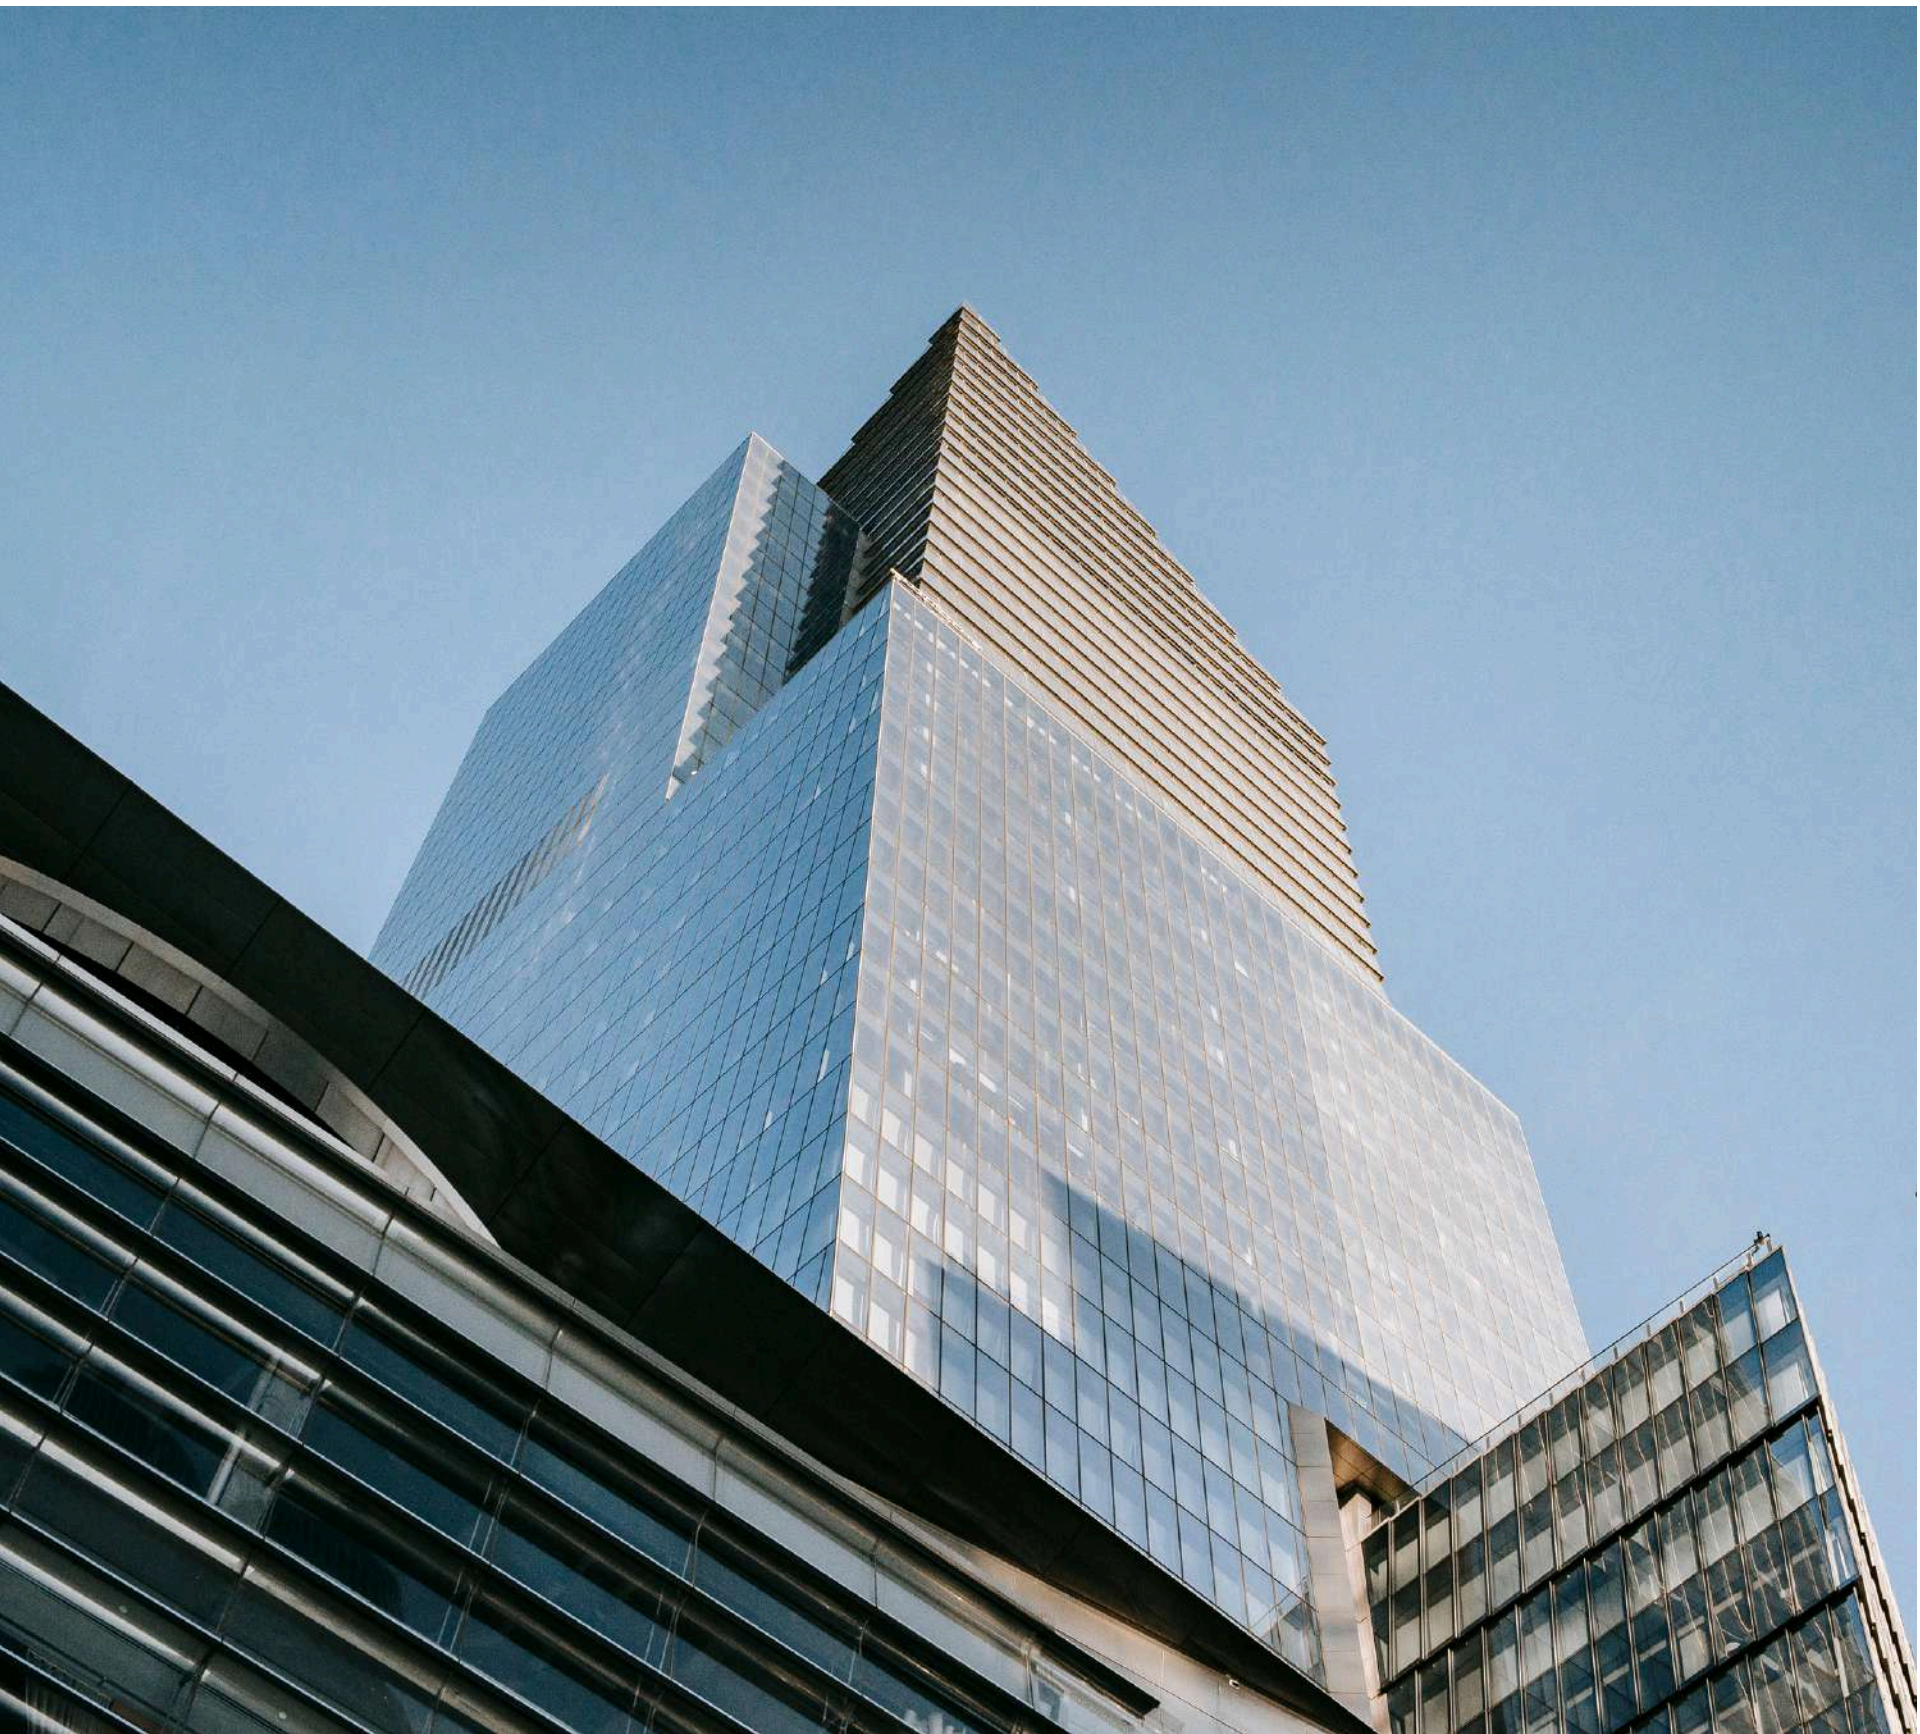

OUR FOUNDER

DEEP MEHTA

Deep Mehta founded Jade Waves Enterprise with a clear vision: to build a reliable, globally trusted raw material supply business rooted in quality, transparency, and long-term partnerships. With a background in international trade and a passion for supply chains, he has grown the company from a single-product operation into a multi-material export business serving industries across construction, water treatment, oil & gas, and more.

From personally overseeing shipments to forging global relationships, Deep brings hands-on leadership and unwavering commitment to every part of the business. His approach is not just about delivering materials—it's about building something meaningful from scratch and connecting people and industries worldwide.

FUTURE PLANS

Our focus is on entering new markets, improving supply chain efficiency, and leveraging digital platforms to enhance global visibility. With a commitment to quality and customer satisfaction, we're building Jade Waves Enterprise into a one-stop solution for industrial raw material needs worldwide.
