

Keep Me Home If...

I have a fever

Temperature of 100°F or higher.

I have a rash, lice or nits

Rashes need to be gone to return or a doctor note identifying the rash as non-contagious. (See 'Rash' guidelines)

I have a persistent runny nose

A clear or green runny nose needs to be wiped every 3-5 minutes (see 'Allergies' in our Family Handbook)

I'm vomiting

One or more times regardless of the cause.

I have a sore throat or persistent cough

A persistent, excessively forceful, or 'barking' cough that interferes with the program day

I have diarrhea

One or more times regardless of the cause.

I have a swollen eye or eye discharge

Any communicable infectious diseases such as pink eye, measles, chicken pox, mumps, strep or bronchial infections;

I'm just not feeling well

Irritable, continuously crying, or requiring one-on-one care to feel comfortable.

If your child is ill or sent home for any illness symptoms, he or she must stay home until he or she is symptom-free and has been symptom-free for 24 hours without medication (the entire following school day).

When Your Child is Sick:

1. Have plans for backup care.
2. Share with the school what is wrong with your child, even if your child stays home.
