

## How We Differ

### Private Pay and Out-of-Network Benefits:

#### Self-Pay Model

- We offer private pay services, meaning you have complete control over your child's therapy plan. There are no session limits or restrictions set by insurance companies.

#### Out-of-Network Benefits

- Many families can be reimbursed through their out-of-network benefits. We provide a Superbill (detailed invoice) for you to submit to your insurance company.

#### No Insurance Restrictions

- Private pay allows us to create a therapy plan that's right for your child, without the limitations or delays that insurance-driven clinics often face. We focus on quality, not quantity, and therapy is based on your child's needs rather than insurance approval.

#### Flexible Session Lengths and Frequency

- Unlike insurance-driven models, private pay allows for flexibility in scheduling and session duration, ensuring your child gets the personalized care they need.

## The Benefits of In-Home, Virtual & Community-Based Services

### In-Home Therapy

In-home therapy allows children to learn in a safe, familiar environment. It's convenient for families and allows us to integrate therapy into your daily routines.

### Virtual Therapy (Teletherapy)

Virtual therapy offers flexibility for families and ensures your child can continue receiving services from anywhere. It's effective, engaging, and provides you with coaching strategies that you can apply in real-time. Virtual therapy is ideal for families who prefer remote sessions or live outside the immediate service area.

### Community-Based Programs

Provides real-world, practical communication opportunities, reinforcing skills in natural settings.

## Welcome to Play All Day Speech Therapy LLC!

**We offer in-home, virtual, and community-based speech therapy services for infants, toddlers and young elementary-aged children and their caregivers using a caregiver coaching and training approach. We follow neurodiversity-affirming practices, celebrating your child's unique interests, strengths and ways of thinking and communicating.**

## What We Offer

### Individualized Speech Therapy

Each child's therapy is tailored to their unique strengths, interests and needs. Our therapy is family-centered, neurodiversity affirming and grounded in evidence-based practices. We use a total communication approach (a variety of verbal and nonverbal communication) to build competent and confident communicators.

### Play & Routines-Based Learning

Using play and daily routines, we help your child improve their speech and language skills in ways that feel natural and fun.

### Caregiver Coaching & Training

We believe that parents and caregivers are a child's first and best teacher. They make the biggest impact on a child's progress. That's why we work closely with you, offering coaching and strategies to support your child's communication development.

## Communicating in the Community Groups

In this unique program, children and their caregivers meet with our speech-language pathologist in a small group at local community spots (parks and playgrounds, libraries, indoor play centers, recreational centers, grocery stores, etc.).

These sessions focus on enhancing social interaction, communication, and language skills in real-world settings, providing opportunities for children to practice communication in the places they visit most with their families.

## Who We Service

### Support for Young Children with a Range of Needs

- Receptive and expressive language delays
- Autism Spectrum Disorder (ASD)
- Articulation Disorders
- Childhood Apraxia of Speech (CAS)
- Bilingual Language Development
- Augmentative & Alternative Communication (AAC)
- Gestalt Language Processors (GLPS) (Using a Natural Language Acquisition (NLA) approach)

## What to Expect

### Initial Assessment

We begin with a comprehensive evaluation to create a personalized plan tailored to your child's needs and your family's specific goals.

### Therapy Sessions

Play and routines-based or virtual sessions, designed to make progress through fun and engaging activities.

### Parent Coaching

We provide ongoing coaching and training to help you support your child's communication journey, whether at home, in the community or virtually.
