

Ho Ho Ho

Colour Challenge

Oh this is gonna be a fun one!! Your Challenge is to select your own colour palette and surface and complete the enclosed design.

You may use any surface of your choosing, any colour palette of your choosing and any MEDIA of your choosing.

You may use any techniques you like, any Products that you want to and you have the freedom to alter the design as much or as little as you want to.

Choosing colours for a project is no small thing, it requires some thought and some understanding of colour theory. Some painters have the ability to choose colours easily and others may struggle with it so I am attaching a little info pack on Colour schemes to help you select colours more effectively.

1: Grab a piece of card stock, cardboard, or watercolour paper. Find swatch the colours (these are your Mid Values) that you select. Having the colours laid out together will give you a better understanding of how well the colours will work together.

2: Select a few values of each colour (Lighter / Darker) for Shading and Highlighting. Swatch this as well, along with the Mid values you selected.

3: and MOST IMPORTANTLY

Enjoy the process of creating! You will surprise yourself!
I for one cannot wait to see what you create!!
