NEW AND FULL MOON OF JUNE 2021

We are going to have a chaotic June, let's get ready!

June 10th, 2021, bring us a new moon with a Solar Eclipse; now, we had the blood Moon with a Lunar Eclipse in May. And some may or may not know the difference between these Eclipses. So before we move on and speak on the new and full Moon, let's discuss the difference between these two Eclipses.

An eclipse refers to what happens when the light from the Sun (a celestial body) becomes blocked entirely or partially by a planet or the Moon (or any other celestial body).

During eclipses, the Moon, the Sun, and the Earth are in alignment. There are two types of eclipses from the Earth's perspective; the solar eclipse (eclipse of the Sun) and the lunar eclipse (eclipse of the Moon)

NEW AND FULL MOON OF JUNE 2021

Differences Between A Solar And Lunar Eclipse

The main difference between these eclipses is how they happen. The solar eclipse occurs when the Moon gets between the Sun and the Earth, this is what will take place on June 10th. This occurrence then results in the Moon casting its shadow on the Earth. Consequently, the day becomes darker. A lunar eclipse happens when the Earth blocks the light of the Sun from reaching the Moon. As a result, the Moon looks like it fades away during a full Moon because it does not reflect any light. The Moon might also appear reddish.

Another difference is that solar eclipse happening during the day, while lunar eclipse takes place at night. Also, a solar eclipse takes place on the new Moon, and the lunar eclipse occurs during the full Moon.

NEW AND FULL MOON OF JUNE 2021

New Moon ☾ in Gemini

The new Moon in Gemini will be a doozy if you let it; we have three planets that will currently be in retrograde during the June new and full moon. These planets are Mercury, Saturn, and Pluto. Now that we are in Gemini season, we have a new moon in Gemini, and Mercury is in retrograde (Gemini ruling planet). It's safe to say June may get crazy.

Gemini is a Masculine Zodiac, and its element is air; it's also a mutable sign. Gemini is lively, energetic, versatile, and intellectual, lives primarily in the mind rather than the emotions, and is highly adaptable to new situations. Gemini is a sign of thought and communication on a personal level. They strive for self-expression and try to impose their point of views on others. And during this retrograde, we may see many people trying to impose their opinion onto others, cause a rife in communication since the ruling planet of Gemini is Mercury, and we are in Gemini season with a new moon in Gemini WOW baby.

NEW AND FULL MOON OF JUNE 2021

**HAPPY NEW AND FULL
MOON JUNE 2021!**

Of course, after a new moon comes to a full moon, and this one is the Strawberry full Moon happening June 24th will be right after the new Moon. The Strawberry moon comes during the Gemini season honoring twins (ibeji in Orisa worship) and the sacredness of the marriage between god and goddess, bringing two into one. You ever wondered why so many people get married in June? Well, now you know why. But because we have three different retrograde happening wedding plan might be postponed, or shit altogether cancelled due to the Mercury mishaps in communication. Saturn is in retrograde during this time can cause people to be cynical and sarcastic, skeptical and coldhearted. And with Pluto also being in retrograde, know that numerous things will have to die in your life to be reborn; this can be your relationship, career, friendships, and so on. So this June, be gentle with yourself because we have so much going, but at least we have the summer solstice to brighten things up.

SUMMER SOLSTICE RITUAL

Bring in the summer with
this powerful ritual.

Many ancient civilizations have celebrated the Summer Solstice. However, many in the black community do not realize; this practice was celebrated in Africa. Ancient Nile Valley civilizations celebrated the summer solstice and saw this as the most important day of the year. This is a time when the Sun reaches its highest point and the farthest distance from Earth. During the summer solstice, the Nile River begins to rise to its highest levels, fertilizing the lands of the valley, marking the beginning of the New Year.

SUMMER SOLSTICE RITUAL

Ra(Sun) was seen as essential to life of all kinds, with the hidden power that placed the Sun in the sky, to be the unknown power from the universe. At this time, celebrations were done in gratitude for the blessings of the Nile waters.

The night before the summer solstice is the Night of the Tear Drop. For it is believed, Aset(Isis) was mourning the death of her love and husband Asar(Osiris), that her tears caused the Nile waters to rise, fertilizing the valley. The fertile soil gave way to rich soil and the abundance of crops.

This sacred time is of heart purification, removing emotional and mental obstacles and infusing the universe's energies to help guide and manifest ones own inner strengths. Lift your spirit, celebrate the fertility and wonders of life, and always remember to have gratitude for everything in your life.

June 20th, 2021, marks 6261 of the Nile Valley calendar.

Two choices lay before you, the first path you will need to take a risk, but the advantage is to fulfil your heart's desire and gain emotional fulfilment or choose the conventional route and continue life as is, with your safety net.
