## HAPPY NEW MONTH!

Hello November and Dias De Los Muertos, so my favorite day, Halloween, has come and gone, and now we have Thanksgiving coming up. Now, I am sure most know that this holiday is one of the colonizers, and they were thankful to their god of war. But we know that we have a holiday coming up. Whether you choose to do nothing on this day, eat, or the natives to this land on that day is up to you. We are still in Scorpio SNZ until November 22nd, and then we are in Sagittarius SNZ, which is all about exploring. Wisdom and travel are what are on the menu for Sag SNZ.

## WELCOME TO ORISACHILD'S DIGEST

Thank you for subscribing

We are also under the number 7 influence for November in numerology, so what does that mean? The number 7 is all about seeking answers, and it coincides with Sagittarius theme of seeking new understanding. Sagittarius is a fire sign always seeking higher levels of wisdom. Use this month to seek answers to gain insight and do this through travel; it will make it even better.

Scorpio again is about change/evolving, and Sagittarius is about seeking and exploring. Not only this, we have a full moon in Taurus, so how does this fits in? Taurus energy is about stability and security. We will need this energy since major transformations will be happening and the energy of stability will help counteract the feeling of not knowing the changes that are happening. We may feel more inclined to be in a state of solitude, which is expected under the seven energy. So during this time, seek answers through solitude, create and stable scared place to open yourself up to communication with the spirit world. Perfect your thinking with the wisdom you will come to gain.

# RETROGRADES AND FALL 2021

Your monthly digest of spiritual knowledge

## **Retrograde**

THANK YOU, EGUNGUN, LOL; we have only two planets that will be in retrograde. Neptune, the planet of dreams, and Uranus planet of intuition are the two that are still in retrograde. But don't sigh relief just yet because these two powerful planets we have will have you seeing things for what they are, and if you have not been putting in the work to use your intuition and read events without a filter, this time may hit you hard. Neptune represents our dreams, life, and mystic qualities. Neptune is the planet of bewitchment. So when it's in retrograde, that dreaminess is out the window, and the dreamy veil of reality will slowly be peeled back. This will be pretty easy since we are under the vibration of the number 7; we all will be seeking answers in a very philosophical and spiritual way. Don't fight what is true. There is no time for fantasy the month we need to see things for what they are. The planet Uranus is the planet of change and originality, and it symbolizes the element of surprise in your life. Uranus brings us sudden events and opportunities; it awakens, shocks, and brings about revolutions. Uranus gives us humans our genius that creates something, new-whether in the arts or science. Use the time to create something new as you will be more inclined to go within to find answers, to see what's true. Create whether it's your writing, drawing, singing, etc. Just do it!

## **New Moon in Scorpio**

Yes, we are still in Scorpio SNZ, and now we have the new moon in Scorpio on November 4th; if you read last month's digest, you know Scorpio is about evolving, transformation, and forgiveness. There will be a lot of emotions in this new moon since Scorpio is a water sign. It's also a fixed sign, so it's lasting energy, so use this time to focus your energy on your transformation. Determine what you need to let go of and what feeling you need to process. Look for what areas in your life needs an upgrade, and let go of what needs to be released.

## Full Moon In Taurus(Snow Moon)

The Snow Moon brings us a time of silence, inner workings, strength, and completion; the days shorten as the end of the year draws near. During this time, the Taurus moon energy is excellent for manifestation, so focusing on manifesting a better version of yourself is paramount during the full moon in Taurus. Year's end is near, and your transition to a better you should start now, not on January 1st. The snow moon will have your transformation come to full view. Take a moment and look at your progress in this moon cycle or over the past year. If there is room for emotional release, feel it fully. Express yourself to the max this full moon. Experience forgiveness and transformation in such a way that you free up energy to receive new things in your life. Let the practical Taurus energy assist you in understanding what is truly sustainable and what has got to change.

# NOVEMBER'S RITUAL MESSAGE

Your monthly digest of spiritual knowledge

By Efunbumi

---

We will blend the two-moon energy for the November ritual to get the most out of the energies. The new moon in Scorpio gives us the insight that if a person's wrongs cannot be rectified and there are events beyond your control, the best remedy is to release and not retribution. So get your crystal out because you are going to need them. And for the full moon vibration in Taurus, do not stay in comfort so long that indulgence becomes necessary.

We will be cleansing and purifying with this ritual to transform and forgive while bringing us the needed wisdom. We will use Selenite since it quickly absorbs and unblocks stagnant or dormant energy built up over time, making the stone a great way to facilitate personal growth. Selenite promotes mental clarity by drawing you back to the present by improving focus and memory.

## MESSAGE

Its all about seeking  
answers and go within.

## ARIES: FIRE ANT (FIRE ENERGY)

What will November 2021  
bring for your Sun sign.

Aries, the fire energy is leading you towards change. You are being challenged to become your better self. The fire ant keywords are aggression, rigid thinking, and following orders. The energy of the fire ant flares up without even noticing. It's the force that attracts people and situations that feed our imbalances rather than those that counter them. Gossiping and blaming are a few indicators that misaligned fire ant energy is at play. This month you may even find yourself "stewing" on a person or situation, only to make things worse. How will you break free from drama and coll down? Fire ants are surprisingly sensitive. Don't pretend the heat doesn't bother you.

**When balanced:** thoughtful, disciplined

**When out of balance:** argues, excess heat, gossips

**To bring into balance:** solo time walks at night

## TAURUS: BLACK EGG (SPIRIT ENERGY)

What will November 2021  
bring for your Sun sign.

How fitting you pulled this card, Taurean, the Black Egg, one of the spirit creatures, a creature of the ether. We have a full moon in Taurus, and the black egg tells you this month to speak from an authentic voice, speak the truth. This month, you will have significant challenges or awakening on the subtle level, the soul or inner spiritual level. The black egg contains one of life's essential treasures-the truth.

Inside of it resides no confusion, excuses, small talk, noise, or lies (not even white ones). This living and breath vessel harbors only that which rings true. When this essence is in balance, we speak slowly and clearly. This month you may be drawn to doing more writing, reading, teaching, singing, or public speaking. And with these activities that you may start, you will begin to ask yourself questions like "what do I know to be true about myself?" and "what do I know about the world?" When the black egg energy is not yet accessed, you will speak from an unsure place. You might say things people want to hear, gossip, or repeat stories to justify your subpar behavior. The black egg will hover over you until you reconnect your authentic voice.

## GEMINI: STINGRAY (WATER ENERGY)

What will November 2021  
bring for your Sun sign.

Gemini, emotions are on the menu for you the month. For November, the Stingray lets you know that you will find yourself at a pivotal point with your personal growth. The moment has come when you have must decide between the old (easy, comfortable, and familiar) and the new (challenging, uncomfortable, and unfamiliar). You might even feel pressure from family and friends to make a decision making things more complicated. No matter the choice made now, it's inevitable that this dilemma will surface again and again because the force of dharma is too strong to ignore. Develop confidence and sense of self and make s choice.

**When in balance:** eager, wants to grow

**When out of balance:** blames others, quits

**To bring into balance:** move through the discomfort.

What will happen  
November 2021 bring for  
your Sun sign.

Cancer, you too choose the spirit card, the ether card. Cancer, you are being asked to reconnect to higher wisdom or divinity. It is time to wake up to curiosity about the higher self and the divine. Just as we ask ourselves, are Unicorns real? Is it a male or female? Did they ever exist? The card is saying to explore, question, and contemplate the inexplicable. The mind's eye knows there's something beyond our day-to-day lives, a deeper dimension to our experiences. The third eye reaches and reaches and reaches out to grasp something more. You are the unicorn, and you have begun your quest for the answers.

Leo, this month you will be restless; you will feel lost in the current. A change of focus is called for; nothing pleases the fish more than movement, movement, and more movement. The roaming lifestyle of the fish may be exhilarating for a while but usually leads to weariness and slippery relationships. The ocean is vast, and with all the possibilities in front of the fish, it can become lost without clear goals and intentions. Spend some time with the lunar forces, dear fish, as the peace and calm of the moon will soothe your soul.

**When in balance:** adaptable, travels well

The Lion's personality dedicates their life to personal and spiritual growth. This dedication inspires some and intimidates others; therefore, the Lion is respected by all but known intimately by few. You are being asked to be observant, stealth, and precise with your words and action. Do not waste your time or resources this month. The card reminds you that self-mastery is available to all, no matter where our quest begins.

Libra, November will be a time to be direct with yourself and expose or reveal to yourself your genuine desire. The card is telling you something significant needs to be exposed. The shark is only dangerous when we don't acknowledge it. It's lurking in the depths of your soul and is creating tension. The shark energy will take over you when you are hesitant, be honest, be "ourselves." totally, or say what you want. Dear Scorpio, the wolf wants you to be the guardian of your family and tribe, get into activism and create a ritual. The wolf's mission is to uphold the well-being and longevity of the pack. When operating under healthy wolf energy, it expresses itself through activism, mentorship, humanitarian efforts, or teaching (religious or political studies). However, this energy can get you in trouble when it assumes every member of the tribe must follow suit- this includes children walking in their parent's footsteps. It might be uncomfortable at; first practice tolerance will help balance out agitated wolf energy. Contemplate the following: embrace all, exclude none.

**When in balance:** reliable, democratic, fearless

**When out of balance:** judgmental, dominating

The turtle is such an ancient soul, grounded, trusting, and at home with the self. Last month brought distress, but this month brings you grounding energy. This energy is behind great writers and storytellers, collecting life experiences under their shells for later use. The most potent turtle energy helps us close all the other books and tell our accurate tale.

Capricorn, you will have a heightened awareness and ability, but you may also feel vulnerable. The Gazelle represents supreme grace. Gazelle are often hyper-aware of their surroundings (bordering on hyper-vigilant), and this can inhibit them from enjoying the beauty they've spent so much effort cultivating. Don't worry about all those predators out there in the wild-when this card appears, it's time to get back to the present moment. Sit down and find your breath. Acknowledge the bounty that surrounds you. Let it nourish your gentle spirit.

Pisces, healing emotional wounds, and expressing your desires is the theme for the month. The Sea Serpent represents the energy of expression; whether it's emotions, creativity, sensuality, or desire-the sea serpent will help you move and direct that energy into a healthy current. When the sea serpents balance, they express themselves creatively and sexually without fear and shame. When the energy is not activated, your emotions and creativity are left in the muddy waters. Some areas of your life may be stagnated while others places will be flooded. You know what you want, so loosen the grip of self-judgment, and let the cool waters forgiveness in to heal our wounds.
