

## Cybersecurity Awareness

Become an **Empowered Protector**

# At Home and at Work

### Collaborate carefully

Don't just trust a link because it's sent via a collaboration tool. Check the link, verify the sender, and always be careful.

### Power up your passwords

Weak passwords leave you vulnerable. Add multifactor authentication to keep threats at bay.

### Surf the web safely

Online threats are pervasive. Look for secure connections such as sites with "https". Think before you click.

### Rely on fact over phishin'

Knowledge is our superpower against cyber threats. Reduce risk with security awareness.

**TIPS TO STAY  
SAFE ONLINE**
