# Beam

## Decorative (Non-Structural) Ceiling Beam System

ASI's Beam ceiling system provides a simple and inexpensive alternative for improving the design of a room with the appearance of solid wood, but without the associated weight and cost. The system is designed to fit together based on project requirements, and custom widths, lengths, and heights are available. Beams may also be used alongside other ceiling systems. Veneer and grain matching as well as end-matching are available options.

### FEATURES

#### APPEARANCE & COLOR

Available in wood veneer in the species shown below\*  
 Blocked beam ends  
 Sleeved beam ends  
 Finished beam ends  
 Veneer end matching available  
 FSC available
