MAKING THE WORLD QUIET, ONE SURFACE AT A TIME

VISIBLY SPEECHLESS

That's how clients describe Acoufelt's products. We are excited about design and acoustics, becoming invested in projects and a passionate collaborator with Designers, Architects, Contractors, End Users, and Facility Managers. We enjoy our work and are immensely proud of every project we get the opportunity to make sound better.

CUSTOMER SERVICE

Driven to provide the BEST experience for our clients.

NRC SPECTRUM

Complete range of acoustic products to cut the echo.

LEAD TIME

Industry leaders with 1-2 week lead times.

PRICE

Price range for all budgets.

WARRANTY

100% customer satisfaction.

QUALITY

Everything we do is to ensure the best product.

THE ACOUSTIC FWC™ PHILOSOPHY

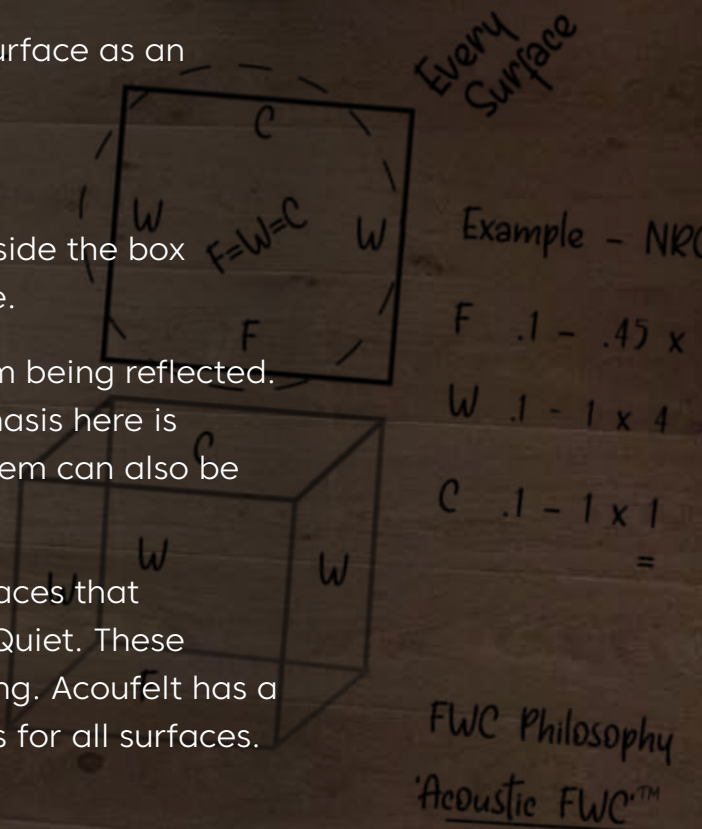

The Acoustic FWC™ philosophy looks at every surface as an opportunity for noise minimization.

SO, HOW DO WE GO ABOUT MAKING QUIET?

Fundamentally, a room is a box. Noise made inside the box reflects and reverberates off every hard surface.

Making Quiet™ is all about inhibiting sound from being reflected. Instead, this sound can be absorbed. The emphasis here is that every surface that contributes to the problem can also be harnessed to help solve the problem.

A box – or cube – has six sides. Six internal surfaces that contribute to either reflecting noise or Making Quiet. These surfaces are: one floor, four walls and one ceiling. Acoufelt has a complete range of innovative acoustic solutions for all surfaces.

FLOOR

Start from the ground up with a wide array of sound absorbing carpet tiles available in a range of color palettes, textures, and styles.

ACOUSTIC CARPET TILES

Match your interior with subtle tones or make an impact with color throughout your space along with sound absorption. Our QuietBack™ carpet tiles offer both environmental and acoustical benefits.

WALL

Your walls can serve both form and function with large acoustic coverings that enhance your interior and dampen sounds.

PANELS AND SCREENS

Treat your walls to more than flat, plain surfaces with attractive solutions of color, texture, and patterns, full printed imagery, and creative cut patterns.

TILES AND SHAPES

Make your walls artful with an assortment of solid color shape tiles or add warmth with wood tone and patterned acoustic planks.

ACOUSTIC ART

Stylish artwork and sculptures that look great and provide sound solutions while adding the flexibility of being able to be hung and moved as you see fit.

CEILING

Take your interior up a notch with a large range of ceiling mounted acoustic sound solutions.

BAFFLES

Heads up - acoustic ceiling sound dampening can be stylish with our ceiling baffle collection. Endless designs available and offered in our full range of colorways.

PANELS

Large panels offered in a wide assortment of colors or custom printed with patterns or textures for smooth, elegant protection.

TILES AND SHAPES

Replace your standard ceiling tiles with solid color or custom printed sound absorbing tiles.

CLOUDS

Ceiling clouds are a modern acoustic treatment designed to be suspended horizontally from a ceiling system, offering an increased surface area for sound absorption. As a standalone free-hanging unit with a large surface area, ceiling clouds provide the opportunity for offering targeted sound absorption in areas that may be acoustically problematic.

OFFICE

Fast and flexible integrated solutions for your open workspace to promote a safe environment and provide acoustic comfort.

INTERLOCKING SCREENS AND DIVIDERS

Adaptable, mobile solutions for individual protection.

PRIVACY SCREENS

Functional desk-mounted solutions for increased coverage.

DIVIDERS

Reduce visual distractions and increase privacy simply.
