

Crystal Point

Features: A single terminated crystal which can have many of the other features below.

Properties: Used to send, focus and direct energy

Double Terminated

Features: A single crystal with a termination at each end.

Properties: Sends and receives energies at the same time. Transmutes negative energies.

Twin

Features: Two Crystal Points which are joined together by their side facets from the base up. Also known as a Companion.

Properties: Balances male and female or yin and yang energies.

Cluster

Features: A group of many Crystal Points which grow from the same base.

Properties: Enhances group meditations and classes. Connects with like minded people and your soul group.

Geode

Features: A hollow rock which contains hundreds of crystals growing inside it.

Properties: Grounding and energizing. Balances Earth energies. Repairs Ley Lines. Connects with Gaia.

Key

Features: A hexagonal or angular shaped recess usually on the side facets of a crystal and near the base.

Properties: Helps awaken your DNA, and integrate lost parts of yourself. Can be used for Shamanic Soul Retrieval.

Rainbow

Features: A rainbow reflection inside the crystal, caused by a special flaw. Only seen when it catches the light.

Properties: Works on all the chakras. Balances the chakras and all layers of the aura.

Inclusion

Features: Other minerals caught inside a crystal. May appear as darker material or bits suspended inside the crystal.

Properties: Will add the properties of whatever the extra mineral is. You can also use the chakra colours to interpret their effects.
