CREATE YOUR OWN CURRENCY

Have your own in-game currency and reward tokens.

Your in-game currency is what is used to play the games available, and what is sold in your shop.

The reward tokens is what is earned during play. How you use this token can be determined by you.
E.g. Use the reward token as incentive which can be exchanged for in-game currency when a certain number is collected. 100 = 1,000,000.

You can change the name and customise the look of your coin to your own brand. You may also set it's value.
