

PROPELA

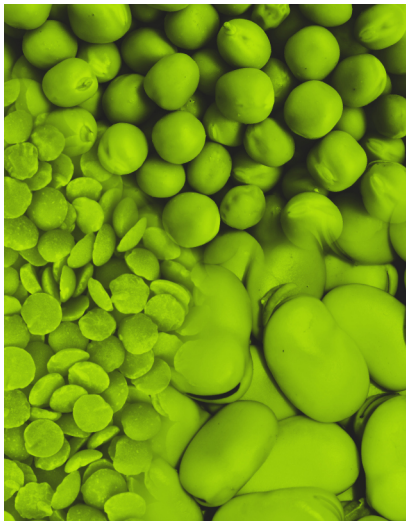

F16 Pea Lentil Faba (*Pisum sativum*, *Lens culinaris*, *Vicia faba*)

AEON PROPELA F16 Pea Lentil Faba is a convenient liquid inoculant featuring **Enhanced Factor 16 Protector technology** to provide pea, lentil, and faba growers with longer on-seed survival while it enhances performance in challenging environments.

Factor 16 Protector technology results in tougher bacteria that **enhances performance** in the field under adverse conditions including drought and high temperatures, flooding and chemical (seed treatment) stresses.

Factor 16 Protector technology also protects active bacteria for **longer on-seed survival** without requiring an extender. This allows growers much greater flexibility in their planting window compared to other seed-applied liquid and peat inoculants.

PRODUCT SPECS.

PACKAGE SIZE

2 × 184 fl. oz.
(5.45 L)

BASIC COMPONENT

Rhizobium
leguminosarum
bv. *viciae*

CROPS

Pea, Lentil &
Faba Bean

FORMULATION TYPE

Factor 16 Protector
Technology

EASE OF USE

AEON PROPELA F16 Pea Lentil Faba is a convenient all-in-one liquid formulation that allows for greater accuracy in application compared to peat formulations, while also eliminating extra product handling and bridging concerns common to granular products.

USAGE GUIDELINES

APPLICATION TYPE

Seed Treatment

APPLICATION RATE

3 fl. oz. per 100 lbs

ON-SEED LIFE

Up to 15 days

PRODUCT TYPE

Direct application liquid

*Use before expiration date. • Once opened, use the entire contents of the container within 24 hours. • Be sure to calibrate in field at time of use. • Ensure delivery system is free of debris and moisture. • Do not allow the product to get wet or dry out. **Contact an AEON representative for specific information.***
