

PROPELA

L1 Soybean (*Glycine max*)

AEON PROPELA L1 Soybean is an economical liquid inoculant, which guarantees effective biological nitrogen fixation.

AEON PROPELA L1 Soybean is a liquid inoculant for Soybean (*Glycine max*) crop. It is formulated with specially selected strains of *Bradyrhizobium japonicum* which can provide effective nodulation to enhance nitrogen-fixation.

PRODUCT SPECS.

PACKAGING

1 × 400 fl oz (11.83 L)
10 × 40 fl oz (1.18 L)

MICROBIOLOGICAL PURITY

Free of
contaminating
microorganisms

MIN. BACTERIA CONCENTRATION

$\geq 4 \times 10^9$ CFU/mL

BASIC COMPONENT

*Bradyrhizobium
japonicum*

SEED TREATMENT

2 fl oz./CWT
(1,3 mL/kg)

SHELF-LIFE (STORAGE CONDITIONS: <25°C)

2 seasons

USAGE GUIDELINES

AEON PROPELA L1 Soybean needs to be applied diluted with non-chlorinated water at total volume of 27-185 L/ha or 3-20 gallons/acre.

**APPLICATION TYPE**Seed Treatment
or In-furrow**PRODUCT TYPE**Direct liquid
application**APPLICATION RATE**0.25 fl oz/1000 ft
(2,5 mL/100 m)**ON-SEED LIFE**

Up to 30 days

ROW WIDTH	RECOMMENDED INOCULANT RATE
15 inches (38 cm)	8,7 fl oz/ac (250 mL/ac)
20 inches (51 cm)	6,5 fl oz/ac (190 mL/ac)
30 inches (76 cm)	4,5 fl oz/ac (130 mL/ac)
36 inches (91 cm)	3,5 fl oz/ac (100 mL/ac)

Use before expiration date. • Once opened, use the entire contents of the container within 24 hours.
• Shake the container well before use to ensure a uniform suspension. • Protecting treated seed from direct sunlight is recommended. • [Contact an AEON representative for specific information](#)
