

# Transitional Strategy Training

**"Change is inevitable. Growth is optional. ~John C. Maxwell**

Every organization will experience a need to transition at some point in time. Therefore, it is important to have a transition strategy in place to address the future state.

A **transitional strategy** is a tailored plan for organizations designed to help them think strategically about business objectives, management needs, and potential risks in hopes of creating a seamless conversion to the new way of doing business. Without a transition strategy, most organizations will have difficulty succeeding in their initiative.

**According to Forbes, approximately 70% of transitions fail.** Many of the reasons for these failures include personnel resistance and a lack of leadership role-modeling.

There is no one-size-fits-all transition strategy. **Woolfolk Enterprises LLC is poised to help your organization navigate transitions through our customized training solution.** Training your leaders and staff on how to deal with transitional periods and understanding the key steps and pitfalls will help you tailor a transition plan that will meet your specific business needs.
