VISUAL ARTIST CHILE/ EEUU

Cyanotype photogram
with 23k gold leaf.

This work came about after finding branches during my walks through the city of Santiago while municipalities were trimming their trees from parks and avenues. The uniqueness of the photographic process, dating back to the 19th century, makes each piece a one-of-a-kind work of art.

VICTOR MAHANA

VISUAL ARTIST CHILE

At the south of the world you´ll find this long and narrow strip of land, with a magical and untamed nature. The remoteness of Chile makes it unique and exotic, a country of almost 19,000 inhabitants with a historical identity and a cultural demography that has been in constant change. What makes our land really special is the making of its creators, artists who, through their hands, create and shape our identity every day. Everyone can see, know and discover Chile and all of Latin America thanks to its art. We have talent worth noting and highlighting. It is very important for it to be known internationally in different cultures such as the Middle East.

You are invited to our two stands at World Art Dubai 2021 to look at the **SOUTH OF THE WORLD**, through the eyes of our artists.
