FINCHCORP

Designed for Bars, Hotels, Clubs, Restaurants and Retail Outlets

Are you in search of a reliable and effective point of sale (POS) system for your business? Whether you operate a hotel, bar, restaurant, or retail outlet, iCell can provide the necessary tools and functionality to ensure smooth and efficient operations. Our solution will not only help you provide fast service to your customers, but it will also allow you to effectively control and manage your selling environment, ultimately maximizing your return on investment. If you are looking to improve the functionality of your business and provide top-notch service to your customers, iCell's POS solution may be the perfect fit.

Design

iCell is a next-generation point of sale (POS) application specifically designed and developed to meet the needs of the hospitality industry. Our software engineers have utilized advanced development tools to create a reliable and user-friendly POS application. In today's constantly evolving market, it is crucial to have a POS solution that can adapt to changing selling patterns. iCell's selling behaviour technology allows for adaptability without the need for additional development, giving you confidence that your investment will remain valuable in the future.

Intelligence

iCell's behaviour catalogue allows for the creation of intelligent products that can adapt their actions based on a variety of factors. This feature is easily edited, providing flexibility and versatility to your business to create unique promotions. The behavior catalogue within iCell ensures that your products can intelligently respond to changing circumstances, providing a seamless and efficient experience for both your employees and customers.

To name a few circumstances in iCell that can be used to create custom promotions:

- Other products and the quantities in a sale
- Time and date of the sale
- Active account / Loyalty members in the sale
- Cashier Active in the sale
- How many times the product has be sold in the day
- Presence of digital passes / Gift cards

Reliability

iCell is a powerful point of sale (POS) system that has been carefully designed to meet the needs of the hospitality industry. Its main server-based network ensures reliable and efficient operations, while its ability to operate in a standalone environment allows for flexibility and adaptability. One of the key features of iCell is its ability to activate promotions at designated times, which will continue to work offline, helping you to effectively market your products and services to your customers. In addition, each terminal can be fitted with optional USB storage for live backups, allowing you to recover seamlessly in the event of any hardware issues. This ensures that your business operations are not disrupted by unforeseen technical difficulties. In addtion to its advanced capabilities, iCell also offers a user-friendly interface that is easy for both management and staff to navigate. This allows your team to focus on providing excellent service to your customers, rather than being bogged down by complex and cumbersome technology.
