

'Sweet Savannah' Calamint

Clinopodium georgianum

Gorgeous, deep green foliage that's fragrant too! Rich, minty fragrance on a tough as nails plant. Survivor of the 2021 Houston Freeze!! Stayed evergreen. Likes sun and really good drainage. Once established, is fairly drought tolerant.

This is a great alternative to boring old dwarf Yaupon, Indian Hawthorn or eww-Boxwood! Sweet little pink flowers appear late summer and continue through the fall. This is a great plant to cut for flower arrangements too. Full sun, partial sun.
