

# Mystic Spires Blue Salvia

*Salvia longispicata* x *farinacea* 'Mystic Spires Blue'

Mystic Spires Blue Salvia is a compact form of another popular salvia called 'Indigo Spires'. Though shorter than 'Indigo Spires', it flowers even more freely during the entire growing season. It produces masses of true-blue flowers that mix nicely with other annuals and perennials, is tolerant of heat and humidity and is not bothered by pests, diseases or deer. Sheds dead petals for a cleaner look in the garden. Butterflies, hummingbirds. Sun to partial sun best. 18"-30" tall.
