

Brazilian Orchid Tree

Bauhinia forficata

One of the hardiest of the Bauhinias! Beautiful, white, 3" – 4" wide orchid-like blooms appear in abundance from spring through summer and are followed by flat, dark brown seed pods. This semi-evergreen to deciduous tree will eventually reach 25 to 30 feet in height with interesting twisted branches. Brazilian Orchid-Tree makes a spectacular vase-shaped specimen, shade, or patio tree, or fits well into a mixed border.
