

Orange Sceptre Buddleia

Buddleia 'Orange Sceptre'

A buddleia hybrid – *B. stachyoides* and *B. tubiflora* fell in love and produced this orange blooming, 8' tall, deer resistant butterfly bush that flowers virtually all year – peaking fall through early summer – a butterfly & hummingbird magnet. The 1' long spikes of bright orange flowers open from bottom to top. 11" long fuzzy gray-green leaves are attractive all on their own. It was evergreen into the low 20's. Sun/partial sun.
