

Brazilian Buttonbush

Centratherum intermedium

The foliage of this tender perennial has a pineapple fragrance and is sometimes called Pineapple Sangria. It grows densely, creating a perfect backdrop for the non-stop show of 1" lavender-blue, fluffy, thistle-like blooms. It grows 1' – 2' tall and will spread 2' –4' with a cascading habit. Easy to grow and pest-free. Well-drained soil. Drought tolerant and heat-loving. Tender in severe winters, but may reseed. **Butterflies!**
