

Yewtopia® Cephalotaxus

Cephalotaxus harringtonia 'Yewtopia®'

This soft needled evergreen thrives in the **shade**. Drought tolerant once established and deer resistant. Because of its compact habit and shapely form, Yewtopia® makes an ideal hedge choice. Does best in well-drained, sandy soils. Insect and disease proof! A great specimen for containers too. The new bright green growth blends well with its older blue-green color. The perfect enhancement to any landscape. Full to part shade. 3'-4'h x 3'-4'w.
