Sweet Autumn Clematis ***Clematis paniculata***

An evergreen native Texas vine that becomes absolutely smothered with small, very fragrant, white flowers in the fall! It literally forms a cloud of white in the garden, for fences, arbors, poles, or going up into trees. It's a vigorous grower once established, & can easily grow up 10'-12' or more. This is one of the very few clematis that does extremely well here. Prefers part shade.
