

Tulip Gingers 2024

Curcumas

Green Chocolate

Maejo Impress 1

Maejo Impress 2

New Ruby

Tulip gingers – so many varieties – return to the garden year after year – partial sun to shade. The best cut flower you can grow. Each year they slowly multiply to create a gorgeous patch of tropical looking beauties that are perennial in Houston. Emerging late in May & June, once they start blooming after a few weeks of growth, they won't stop until fall. They love the heat!
