

'Vintage Jade' Distylium

Distylium hybrid 'Vintage Jade'

A compact, **evergreen**, disease & insect-resistant shrub that grows in sun to partial shade. Heat & drought tolerant – Distylium will also tolerate wet soils. Small reddishflowers in late winter are somewhat insignificant. Virtually **maintenance free** – Distylium is a member of the witch hazel family. 'Vintage Jade' has a compact, low-spreading growth habit, 3'x5' . Landscapers & gardeners alike quickly fall in love with its unique foliage – a great alternative to the same old foundation plants. Try it!! Our recent cold weather with temps below 20 didn't faze these workhorses! Deer resistant. Looks best left unpruned and natural.
