

Fireman's Cap

Erythrina crista-galli

Fireman's Cap tree at Treeseach Farms

A stunning tropical tree that can reach 20' tall. Although classified as being "tropical", they're root hardy, coming back even after our hardest winters here in Houston. Large 18"-24" reddish-orange panicles appear off and on throughout the summer. Likes full sun. Will take wet or dry conditions. A hummingbird favorite.
