

# Blue Star Fern

*Polypodium (phlebodium) aureum* 'Blue Star'

Frosted blue fern hardy to zone 7 – likes well drained soils. Great for containers too. 12”-24”, shade to part shade. Larger fronds take awhile to develop, but worth the wait! Great color in the landscape. Slow, creeping habit in the ground with large whitish rhizomes. Evergreen if our winter is mild. Otherwise, usually will come back up from the ground.
