

Southern Home Grape

Vitis rotundifolia x vinifera 'Southern Home' PP9454

This vine is a cross between a muscadine & a bunch grape. It is highly recommended for home plantings because it's **self-fertile**, has good flavor, and the cut leaf pattern of the leaves is very ornamental. It has some of the same attributes as other popular muscadines such as vigor, disease resistance and even ripening. Harvest period is mid-season to late. Zone 7 - 9. You can tell the hybrid nature of this cultivar by the cut leaf pattern of the leaves.
