

Cassian Fountain Grass

Pennisetum alopecuroides 'Cassian'

Cassian is one of the best dwarf fountain grasses for the Houston area and one of our favorites here at TSF! Nice tight clumps of narrow green foliage topped with creamy white foxtail flower heads in summer, maturing to creamy-tan – holds its blooms for months! Averages 2' x 2', height 3' with blooms. Sun & good drainage are all it needs to be happy!
