

Bronze Fennel

Foeniculum vulgare 'Rubrum'

Wispy dark bronze foliage topped with yellow flowers make bronze fennel a striking addition to the landscape. 4' perennial - its feathery foliage is licorice scented. Used in cooking or just as an ornamental herb. Fennel is also a host plant for the **Black Swallowtail butterfly**. Plant in full sun to part shade in a well-drained soil. The yellow flowers attract many pollinators. Nice in flower arrangements – foliage and flowers!
