

# Tricolor Hibiscus

*Hibiscus tiliacea*

A stunning 6'+ hibiscus grown for its heart shaped foliage which has variegations of white, cream, pink, red and orange. The new growth emerges a gorgeous orange-red hue. Tricolor loves the heat and will reward you with non-stop lush foliage summer through fall. Older plants can be root hardy if we freeze – otherwise, take care to protect this magnificent hibiscus from freezing temps. Full sun is best but tolerates some shade.
