

Terri's Pink Hibiscus

Hibiscus x paramutabilis 'Terri's Pink'

A unique, root hardy mallow that blooms continuously spring through frost. 'Terri's Pink' does not produce seed pods; therefore, it blooms without interruption. Its bright pink flowers are 6" across on plants that can grow up to 6'h x 4'w – easily pruned to maintain smaller stature if desired. Maple-leaf shaped foliage continues looking good when other mallows begin to defoliate. Returns year after year and never disappoints! Sun to part sun.
