

**‘Paco’s’
Possumhaw Holly
Ilex decidua ‘Paco’s’**

**This selection is an
outstanding female
plant!**

**A shelter & food source
for birds.**

A single or multi-trunked native, small ornamental tree where the female is absolutely covered with showy, bright red berries all fall, winter, & early spring. As the berries age going into spring, the color changes to a red-orange & eventually will be devoured by birds in minutes! Possumhaw is tough, drought tolerant, & will take periodic wet conditions. Grows to about 18’ tall. Sun or part shade. It glows in the landscape during the dreary winter months!
