

Oscar's Dwarf Yaupon

Ilex vomitoria 'Oscar's Dwarf'

'Oscar's Dwarf' yaupon holly is a slower growing, more compact, softer form of the dwarf yaupons you see all over Houston. The color is a blueish-green, the leaves are larger and the growth habit is more rounded. It can take years to reach its full 2' in height – a plus – no maintenance! We love this yaupon and so do landscapers who take the plunge with Oscar – they never go back to plain old dwarf yaupon.
