

Cherry Bomb Holly

Ilex x 'Cherry Bomb'

A hedge of Cherry Bombs at Treesearch Farms

Cherry Bomb holly has a compact, rounded habit and glossy, dark green, spineless evergreen foliage. Large, **bright red berries** produced in abundance in the fall and persist until spring.

Grows in sun, partial sun or understory shade.

Slow grower – over time can reach 6'-7' h x 4'-5' wide. Drought tolerant once established and can also tolerate the occasional flood. New growth is a lovely bronzy-red color. Virtually maintenance free!
