

Common Name: Inland Sea Oats
Botanical Name: *Chasmanthium latifolium*

Plant Type: Grass

Growth habit: A graceful, clumping, deciduous grass treasured for its showy, drooping flowers and seed heads and rich bamboo-like foliage. It's effective planted in masses, in tubs, or containers and is a good flowering accent in shady and damp situations. It's salt tolerant and the bamboo-like foliage creates a lovely tropical effect. Also is wonderful in fresh and dried arrangements.

Exposure: Shade

Mature Height: 2' – 3'

Attracts/Supports Wildlife: None noted
