

# Maverick® Mesquite

*Prosopis glandulosa* Maverick®

Maverick® is a thornless selection of the Texas honey mesquite. A very cold-hardy mesquite, spreads 30' x 30' –it has an open and irregular growth habit. Can be pruned to maintain a more uniform look if desired. Bright green leaves with widely spaced leaflets. Smooth gray bark. Inconspicuous fragrant yellow flowers in the spring. They also produce seed pods that are attractive to birds. Fast growing, full sun. Best suited to open spaces where it can spread out.
