## Rangoon Creeper

*Quisqualis indica*

A gorgeous, lush, unbelievably long blooming vine for sunny gardens. It's strong, fast growing & root hardy down to the high teens (if mulched well). Rangoon Creeper produces very fragrant flower clusters that explode with a fireworks display of white, pink, & red flowers all summer & fall. Over a 2 to 3 day period, the flowers open white, change to pink, then to bright red. Sun. Fairly drought tolerant once established. Very fragrant!
