

# Giant Rudbeckia

## *Rudbeckia maxima*

This native, perennial rudbeckia has it all ! Huge, evergreen, **powder blue leaves** all year. Mammoth 5'-6' stalks of large, **deep gold** flowers with a dark, textured center—a gorgeous cut flower!

**Butterflies and birds** love it! **Deer proof.** Likes wet feet, but is surprisingly drought tolerant once established – thrives in hot and humid summers. Perfect for rain gardens.
