

'Pele's Smoke' Purple Sugarcane

Saccharum officinarum 'Pele's Smoke'

Pele's Smoke sugarcane is ornamental & edible. The foliage is dark purple to black if grown in full sun. The canes are also dark purple. It can grow 8'+ and makes a dramatic statement in the landscape. Upright, dense and spreading. Can spread underground by rhizomes. It's dark sword like leaves arch out and can be 4'+ long. Holds its dramatic color all summer – does not fade in the heat. It can bloom in frost free climates. Plant in sun, rich soil and provide ample watering.
