

Salvia 'Wendy's Wish'

Salvia hybrid

Extremely interesting, jumbo, shrimp-like buds open to tubular magenta-fuchsia blooms that have with fluted edges. Attractive dark green leaves with dark maroon stems. 24" - 36" tall and wide. Sun, well-drained soil.

This Australian salvia was given 'honorary Texan' status by Jimmy Turner of the Dallas Arboretum.

It's called 'Wendy's Wish' because the breeder wishes to donate a portion of each sale to charity.
