

Yellow Philippine Ground Orchid

Spathoglottis sp.

A new color of this beautiful terrestrial orchid. Attractive 12"-18" pleated, palm-like foliage. Also referred to as "Garden Orchids", they produce 18"-24" very showy, erect flower spikes of sunny yellow orchids over an extremely long period, 2-3 months, during the warm to hot months. Root hardy in mild winters or protected areas. Near the coast they are normally evergreen. Easy to grow & multiply well. Part shade. Needs moist, well-drained soil.
