

Bubblegum Pink Salvia

Salvia hybrid

Jumbo, shrimp like buds open to tubular bubble gum pink blooms on this gorgeous salvia. Will tolerate full sun if planted early in the spring so it has time to adjust. Performs very well in partial sun in hot climates. Keep pinched/pruned to maintain a fuller shape.

Can get 24"-36" tall and wide. Attracts hummingbirds, butterflies and bees. Normally deer resistant too. Perennial in most Houston winters.
