

# Heart A'fire® Redbud

*Cercis canadensis* 'JN100' PPAF

This small, ornamental tree will appear as if it's on fire as it bursts forth new growth in the spring. Dark pink flowers are produced in early spring and are closely followed by heart-shaped leaves of burgundy, red, tangerine and gold. As the leaves mature, they darken to green, but new growth will always appear "a'fire" throughout the growing seasons! 10'-15'.
